

## **CT climbs 16 positions and ranks 34 in the ‘Best Companies to Work In’ list**

CT ranks 34 in the ‘Best Companies to Work In’ list compiled by the magazine *Actualidad Económica* (by *Expansión* journal). CT makes the list for the fourth consecutive year as the best engineering services company in Spain.

**Madrid, September 30th 2019**

For the 4th year in a row, CT, the leading engineering company in technological innovation throughout the entire product lifecycle, holds a place in the 'The Best Companies to Work In' list, compiled by the magazine *Actualidad Económica*. In this 2019 edition, CT climbs 16 positions from last year's ranking, consolidating itself among the 34 best companies to work in in Spain.

Since its first edition occupying the 53<sup>rd</sup> position, CT has continually improved its rating in terms of talent retention, work environment, CSR, training, compensation and compensation or employees feedback, among others.

The 2019 edition represents a historical milestone for the company which maintains its position as the first engineering services company for the fourth year in a row. This year, the evaluation highlights the company's concern for its employees' training, materialized in the deployment of an e-learning platform accessible to everyone in the company. Its availability in four languages and interactive character (allowing all employees to propose new topics and share information) are one of the most valued features.

The “Best Companies to Work” ranking bases its score on an extensive and rigorous questionnaire supervised by independent consultants and experts in human resources. The methodology measures variables like work conditions, career planning, undesired turnover, retributions, social benefits, settlements or investment in training. What's more, this ranking requires various employees to evaluate the Company on variables such as corporate values, management, and work conditions. An evaluation that leads CT to strengthen its position amongst other recognized brands from other sectors, such as Securitas Direct, CaixaBank or Naturgy.

## **About CT**

CT provides engineering services in the aeronautical, naval, automotive, rail, energy, industrial plants, architecture and construction sectors. CT covers the entire life cycle of the products, from product design engineering, manufacturing engineering to post-sales support engineering. CT has more than 1,700 employees and a network of offices in Spain, France, Germany, Portugal, the United Kingdom, India and Brazil. CT is a supplier of engineering services in design, manufacturing, assembly and maintenance phases for the civil and military sector. CT is the only Spanish supplier of product engineering (ES2) and manufacturing (ME3S) for Airbus in the world and a preferred supplier of engineering for Navantia. Other relevant works stand out, such as the participation of the CT Architecture division in the La Sagrada Familia project or the Automotive Engineering division in the Medina-Mecca AVE.
